Appendix 2: Vendor Links

The main advice is to work with a local solutions provider where possible, for knowledgeable, trained installation and maintenance support, who have links back to the manufacturer of the products used.

It is useful, however, to gain a basic understanding of products and design independent of the suppliers so the following links are provided to manufacturer web sites on the Internet. All these manufacturers work with a large network of dealers around the world (local solutions providers) to sell and distribute products though they can and do sell directly through their web sites.

- Cisco Systems - https://meraki.cisco.com/solutions/
- Dell Canada - https://www.dell.com/en-ca/work/shop/networking/sc/networking-products
- Commscope/Ruckus - https://www.commscope.com/ruckus?utm_source=ruckus&utm_medium=redirect
