Export MARC Records from Drupal

* Please note that the MARC exporter tool is still under development

1. Login to nnels.ca.
2. In the NNELS Admin drop-down menu, select MARX XML File Builder - Searchable (Field Collection) or [click this link](#).
3. Use the search filters to locate the records that you want to export and click Apply.
4. Check the records that you want to export.
5. Click Generate MARC XML Export File. You will be given the option to select records across multiple pages. (Note that large amount of records, such as over 10,000, will take a very long time to process; alternatively, you may export multiple records and combine them later.)

Operations

Generate MARC XML export file

<input type="checkbox"/>	NID	Title	Access Rights	Item ID	File Format	Running Time (seconds)	Performed / Narrated by	Partner Sharing	Date	Name of Publisher	File Uploaded
Selected 200 rows in this page. Select all 4291 rows in this view.											
<input type="checkbox"/>	202063	12 rules for life : An Antidote to Chaos	Requires Login	View Item 2612309	DOC			Permitted	2020	BC Libraries Cooperative	01/22/2020 - 16:41 Edit
<input type="checkbox"/>	202063	12 rules for life : An Antidote to Chaos	Requires Login	View Item 2612312	EPUB 2			Permitted	2020	BC Libraries Cooperative	01/22/2020 - 16:42 Edit
<input type="checkbox"/>	14125	Tuesdays with Morrie an Old Man, a Young Man, and Life's Greatest Lesson	Requires Login	View Item 2778283	EPUB 3			Permitted	2019	BC Libraries Cooperative	11/22/2019 - 16:58 Edit
<input type="checkbox"/>	14125	Tuesdays with Morrie an Old Man, a Young Man, and Life's Greatest Lesson	Requires Login	View Item 2778277	DOC			Permitted	2019	BC Libraries Cooperative	11/22/2019 - 16:56 Edit

6. Enter a title for your record set in the Title of new record-set field. This is for your reference only.
7. Enter a description for your record set or leave it as the default "my description".
8. Click Next
9. You will be taken back to the main page. You should see a message at the top of the page similar to: File saved: please download via /export-sets/0CLC-batch-1
10. Click on the above link and you'll be taken to the page where your record set lives.
11. On this page, you should see something similar to: MARCXML Export Collection: File marcxml_export_198580.xml
12. Click on the link to view the MARC XML file in your browser or right-click on the link and select Download Linked File As to save the MARC XML file to your computer.
13. You can open the XML file using the software of your choice on your computer, i.e. a text editor, a browser, MarcEdit, etc.
14. To locate your exported record set in the future, you can find it on the [Marc Export Sets](#) page.

Convert from MARC XML to MRC using MarcEdit

* Instructions may vary slightly depending on your version of MarcEdit.

1. Open MarcEdit

2. Select **Tools**
3. For **Input File** select the exported MARC XML file, i.e. `marcxml_export_1.xml`
4. For **Save File** select where you want to save the output MRC file on your computer. Name it using the `.mrc` extension, i.e. `marcxml_export_1.mrc`
5. From the **Function List**, select: **MARCXML⇒MARC**
6. Leave the other fields as is.
7. Click **Execute**.
8. MarcEdit will process the XML file and you should find the `.MRC` file wherever you chose to save it on your computer (in step 4).

Convert multiple MARC XML files to MRC

- Open MarcEdit.
- Click on **Tools** in the menu bar.
- Select **Batch Process Records**. A new window will open called **MARC Utilities**.
- In the **Source Directory** field, select the folder where the MARC XML files live. Make sure these are the only XML files in the folder.
- In the **File Types** field, input: `xml`
- In the **Functions** drop-down menu, select: **MARCXML⇒MARC**
- Click **Process**.
- You will find the output MRC files in a folder called `processed_files` within the source directory you specified in step 2.

Combine Files using MarcEdit

You can use MarcEdit's **MARCJoin** feature to combine multiple MRC files into a single file:

1. Open MarcEdit.
2. Select **MARCJoin**.
3. In the **Save File** field, select where you want to save the output file on your computer and give it a name, i.e. `marcxml-export-combined.mrc`
4. In the **File(s) to Join** field, select all the MRC files that you want to combine into one file.
5. Leave the **Join Individual Files** box checked.
6. Click **Process**.
7. MarcEdit will process your files and save the combined file in the location you specified in step 3.

Troubleshooting records with invalid XML

Some records may fail to export from Drupal with the error message "Invalid XML". To fix this:

1. Go to the record's "node" (or main page) in Drupal, e.g.,
<https://nnels.ca/items/thuvia-maid-mars>

2. Click **Edit**.
3. Go to the **System NoEdit** tab.
4. Look at the MARCXML there (MARC XML String field) - make sure it is valid (you can use MarcEdit to validate); check that the <marc:record> opening and closing tags exist, and that all other tags have opening and closing tags.
5. Make any changes as needed.
6. Click **Save**.
7. Re-export the record.
