Exporting Book from Converter Plus 1

Exporting Book from Converter Plus

You are now ready to export your book!

Make sure that you have gone through all the steps above carefully, and you have double-checked your work before you export. It is very important that we are naming the sections correctly, and this is the time to just take a moment to go over your work before exporting.

After you select **Export the Project** you will be on the export page. Here you will see some information about the file including:

- Size
- Runtime
- Encoding

If the file is large, you will be presented with a button **Compress to Standard Talking Book Quality** or **Compress to Production Quality**. You only need the **Production Quality** if there are special effects in the audiobook. Most audiobooks need only the **Standard Talking Book Quality**. If you can't remember, then just go back to the book and listen to it. Is there music? If there is then choose **Production Quality**. If in doubt, ask.

If something seems off in the information on this page, stop what you are doing and do not **Export** it. You will need to pass it to Rachel for her to look at the file. An example of something wrong includes a very short run time. If everything looks good then continue to export.

Select **Export** to create an accessible edition of your book!

Once it is exported, you can go back to the main project page and pass the book to **Quality Assurance**.

You can also use **Batch Mode** to import and export multiple projects. Please see [Batch Mode](#) for more information
