in Word for Mac	1
in LibreOffice	1

Hyperlinks

We retain all hyperlinks.

We only remove hyperlinks for indexes with page numbers.

You will need to check to make sure the link works. Simply click on the link to make sure it opens to an active and correct webpage

If it does not link properly you will have to edit the link.

To edit a hyperlink:

- Right click on the link to open the menu
- Select Hyperlink>Edit Hyperlink
- This will open a new window
- Make sure there correct URL is in the address box under the Web Page or File tab

Links for DAISY Reformatting

We still receive patron requests for DAISY books. If it is a DAISY request you will remove all links.

If the Request is for DAISY there will be a note within the ticket of the title.

Hyperlinks must be removed, or unlinked, for conversion to DAISY. The URL text without the links can be retained.

Even after following the instructions below, links can sometimes be oddly persistent. Be sure to hover over each URL you see to make sure that it is not still a hyperlink - even if the text is "Normal" Style and not blue, the link may still be hiding.

in Word

1. Ctrl+A to select all text
2. Ctrl+shift+F9 to remove all hyperlinks

in Word for Mac

1. Cmd+A to select all text
2. Cmd+6 to remove hyperlinks (may need to adjust text colour if it stays blue)

in LibreOffice

1. Select one of the items in the document that contains a hyperlink. Open the context menu and select "Remove Hyperlink."

2. Press CTRL+A to select the entire document.
3. Press CTRL+SHIFT+Y to "Repeat: Reset attributes"
