# MP3 to DAISY Questions

Have any questions about how to use Converter Plus for MP3 to DAISY conversion? Questions about how to name a particular track? Confused about how to reorder tracks? Anything else related to the workflow? Please post them below.

If you have an issue that is file specific, please use the [Hand to Rachel](#) function, so she can look at the file and help solve the issue.

If you come across an error or bug, please use [Report Tracker](#).

---

Q: I just have a question about naming tracks. In the book I'm working on (Nyxia Unleashed), each chapter has a title and a subtitle. The subtitle indicates the character voice for that chapter. The narrator reads the title and subtitle together at the beginning of each chapter. But the table of contents I found online for the book only includes the chapter titles. So I'm just wondering whether I should be including the subtitle in the track names?

A: In this case match what the narrator says.
