# Publishing Files in NNELS Step-by-Step

Here you'll learn about all the steps involved in publishing files to NNELS - from preparing the MARC XML files and parsing the data in Drupal to attaching the files to their Drupal records.

1. [Creating a MARC XML record set](#)
2. [Uploading a MARC XML record set](#)
3. [Parsing a MARC XML record set](#)
4. [Creating a S3 record set](#)
5. [Uploading a S3 record set](#)
6. [Attaching the file in S3 to its record in Drupal](#)
7. [Publishing the files \(in bulk\)](#)

Note that the above processes #5-#8, only apply when you want to publish a batch of files simultaneously (such as for large purchase orders). To publish single titles on NNELS, see:

- [Publishing single files](#)

## Updating record set metadata in bulk:

- [Update the File Format in bulk](#)
- [Update the File Publisher in bulk](#)
- [Update the File Date in bulk](#)
- Update the File Size in bulk [instructions to be added]

## Other tasks:

- [Adding books to collections in Drupal](#)

## Free software you'll need:

- [MarcEdit](#)
- [Cyberduck](#) - NNELS will set you up with an account
- [Evergreen](#) - NNELS will set you up with an account
