Publishing the files 1

Publishing the files

Once the records look good (with accurate and complete metadata) and the files are attached, you can go ahead and publish the files to NNELS!

1. In the NNELS Admin drop-down menu, navigate to MARC XML Record Sets
2. Click on the title of the record set that contains the books you want to publish.
3. Check the box to select all the records in the set. If it's a large record set that is more than one page, be sure to click on **Select all # rows in this view**.
4. Click on the **Publish Content** operation
5. All the books will now be visible on the NNELS homepage
